

For Immediate Release:

Material Handling Equipment Manufacturer –Dearborn Mid-West Conveyor Co.
Expanding Operations in Detroit.

Detroit, Michigan – Material Handling Equipment Manufacturer, Dearborn Mid-West Conveyor Co. (DMWCC), is expanding its manufacturing operation to its City of Detroit complex. By 2012, DMWCC plans to invest \$2.0 million in facility upgrades as well as capital equipment to its former manufacturing facility located on Auburn Street. In addition, DMWCC plans on adding twenty to thirty skilled trades workers, primarily welders and fabricators over the next several months.

The facility will fabricate material handling systems for DMWCC’s Kansas City-based bulk handling division, which specializes in furnishing the design, supply, erection and commissioning of bulk materials handling.

“We are pleased and proud that we can contribute to local economic growth by re-opening the Detroit fabrication shop,” said Tony Rosati, President and CEO of DMWCC. “We believe the decision to expand our business in this direction will be beneficial to the community, the employees and their families, and to our Kansas City operation. This new manufacturing resource will also enable us to provide an additional high quality product and service to our customers.”

About Dearborn Mid-West Conveyor Co.:

Founded in 1946, Dearborn Mid-West Conveyor Co. provides turnkey material handling systems for a wide range of applications. DMWCC is the sought-after partner for the design, integration and installation of complex material handling systems for hard working industries in North America and abroad. Key industries served include Automotive, Power Generation, Steel Mills, Refineries, Cement, Mining, Port facilities, Parcel Post, Courier, Manufacturing Equipment Installation, Construction and Life Cycle Improvements.

DMWCC has Project Management and Engineering offices in Taylor, Michigan and Fairway, Kansas. DMWCC also has an existing manufacturing facility in Taylor, Michigan adjacent to its Taylor office.
